1. During May and June 1952 squads of Yugoslav demolition engineers planted mines capable of interrupting rail and road traffic at the points indicated on the attached sketch.
2. Mining of portions of the Ljubljana-Postojna railway has been accomplished by placing explosives in the pillars of the viaduct southwest of Vrhnika, under which the old Vrhnika-Logatec road passes. Four mine chambers are visible at the base of the pillar on the eastern side of the road. Each of these chambers is 0.40 meters square. Preparation of such obstructions in this area is still in progress.
3. Mines have been placed in the supporting embankments of the road system also indicated on the attached sketch. Outer covering of the mines themselves can be seen.
4. Mines have also been placed along the Ljubljana-Vrhnika road at the point of the Ljubljana-Vrhnika railway line.
